## Pennywise The Clown (1990)

You must know about the wave of sightings in recent clown prankster and also the response given by the people. Whereas last year I was thrilled to watch clown pranks on youtube, and laughs when people fear being made fun of by the clown. I wonder what that prankster clown is thinking now, a lot of prankster clowns were hurt and even shot because they are too scary. I do not know who is right, but if the clown was shot then it was already an excessive response. About a scary clown and also upcoming Halloween, I immediately thought of the "IT" miniseries in the 90s. The clown name was Pennywise the Clown. The clown that I made into papercraft model is a 90s adaptation version from The Clown in a novel by Stephen King, with the same name. The template is consist of 3 pages, the model will has 15 cm in height or 6 inches. I made 2 version of head part which you can choose to build.
