## BMW 320i - Russian Bears Motorsport

Scale 1:16 & 1:24

Another beautiful BMW M3 GTR paint scheme paper model template done by our friend Sergey Timinsky. This car is belong to Prototype Technology Group, a racing team from United States founded by Tom Milner (Tommy Milner). The paint scheme itself was used when they participated on Grand-Am Road Racing in 2004, which was held on Virginia International Raceway. The drivers are Billy Johnson and Tom Milner himself. As usual Sergey also made a 1:24 scale version of this template which you can find it after 1:16 scale template pages. You can use assembly instructions from the BMW M3 GTR.
